

# QUALITY AND ENVIRONMENT POLICY

**Elga Europe**, a company that operates in the production of printed circuit boards and the semiconductor industry at international level, is aware of the need to continuously guarantee the complete satisfaction of its customers by ensuring that their products are constantly adapted to the level of their needs.

Particularly the Management strongly promotes the name of **Elga Europe** in the global market supporting the ORDYL Dry Film worldwide in the main research institutes for new technologies as a key product for devices with various and special applications.

To pursue this objective, the Management adopted a management system for quality and environment in according to the ISO 9001:2015 and ISO 14001:2015 regulations.

In order that the management system can be considered compliant with the relevant standards, **Elga Europe** undertakes to:

- Realize products using as a strategic tool the preventive and periodic assessment of risks deriving from the analysis of its context and adequately interpreting the needs and expectations of the concerned parties, while safeguarding the economic result.
- Operate with all compliance obligations applicable to products offered to the customers and all requirements relevant to the company context.
- Evaluate the environmental impact of its processes and direct its choices towards the best economically compatible technologies to protect the environment and prevent pollution, implementing measures to prevent environmental incidents that could involve the local community since **Elga Europe** is placed within a town and ensuring an adequate response in case of need.
- Promote the reduction of energy consumption and natural resources wherever possible.
- Promote the recycling or recovery of waste produced, taking into consideration the environment, health and safety of the products life cycle from supply phases to final disposal.
- Monitor gaseous emissions and water discharges.
- Train and involve all company personnel, in relation to their tasks and responsibilities, to make them aware of the qualitative and environmental impacts deriving from their activities and the importance of their competence in achieving the improvement objectives defined in the "Improvement Quality and Environment Plan" that the Management undertakes to analyze and verify during the review.

The commitments undertaken with this policy are also pursued through scheduled internal audit cycle and the periodic reevaluation of the policy itself considering any changes in the internal and external context of the company and any other corporate requirement in order to keep it adequate.

**Elga Europe s.r.l.**
